

Needed Equipment

- 1) Phillips Screwdriver, P2 size.
- 2) Rack mount hardware kit # RM209.

Important Safety Information

- Remove power at all times while conducting removal / installation of rack mount hardware.
- Use only the fasteners provided by AudioControl. We have included extras in the kit.

- 1) Remove Power Cord from the Bijou 600
- 2) Determine which side of the rack you wish to mount the Bijou 600. The rack ears will fit both left and right sides.
- 3) Mount the short ear on your preferred side:
 - a) Locate the two screws on the side of the product near the front panel.

- b) Remove and **SAVE** these screws. Do not remove any other screws.
- c) Place the short ear over the cover with the mounting flange forward.
- d) Reinstall the two screws removed earlier.

- 4) Mount the long ear on the opposite side.
 - a) The process is the same as the short ear, simply on the other side.
- 5) Mount the assembly to the rack.
 - a) We have included four #10-32 screws in your kit for this purpose.
