

**Needed Equipment**

- 1) Phillips Screwdriver, P2 size.
- 2) Rack mount hardware kit # RM211.

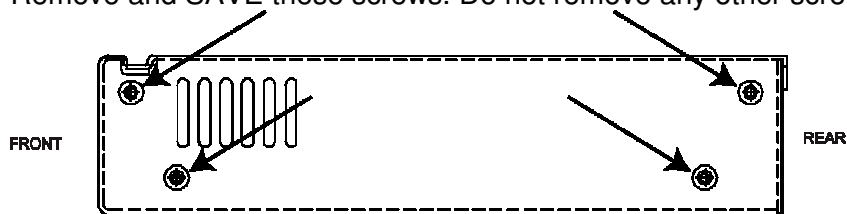

**Important Safety Information**

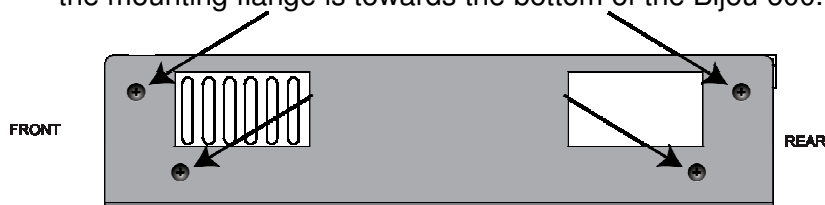

- Remove power at all times while conducting removal / installation of rack mount hardware.
- Use only the fasteners provided by AudioControl. We have included extras in the kit.

- 1) Remove Power Cord from the Bijou 600 unit.
- 2) Locate the four screws on one side of the Bijou 600.
- 3) Remove and **SAVE** these screws. Do not remove any other screws at this time.

- a) Align one mounting bracket with the side of the Bijou 600 with removed screws. Ensure that the mounting flange is towards the bottom of the Bijou 600.

- b) Reinstall the four screws removed earlier.
- 4) Repeat step 3 on the opposite side of the Bijou 600.
- 5) Mount the assembly.
  - a) We have included four #10-32 screws and nuts in the kit to allow convenient mounting to our RM213 Component Mounting Plate.
